

Ultra-Compact 6-Axis Manipulator

The new KOHZU 6-Axis Manipulator is a culmination of our extensive expertise in production and analysis equipment.

- Size and weight have been reduced while maintaining high accuracy and rigidity!
- High precision ball screw drives for all axes ensure a long performance life!

USM-R1C-001

Feature

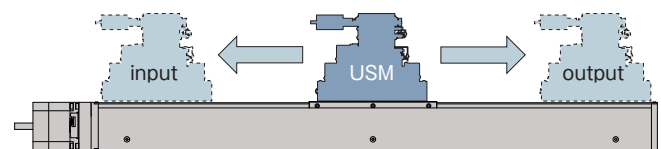

1 Centralized Connector Unit

The 6-axis motor and sensor wiring are concentrated in one location to make even complicated multi-axis wiring work easy (can also be removed if not needed).

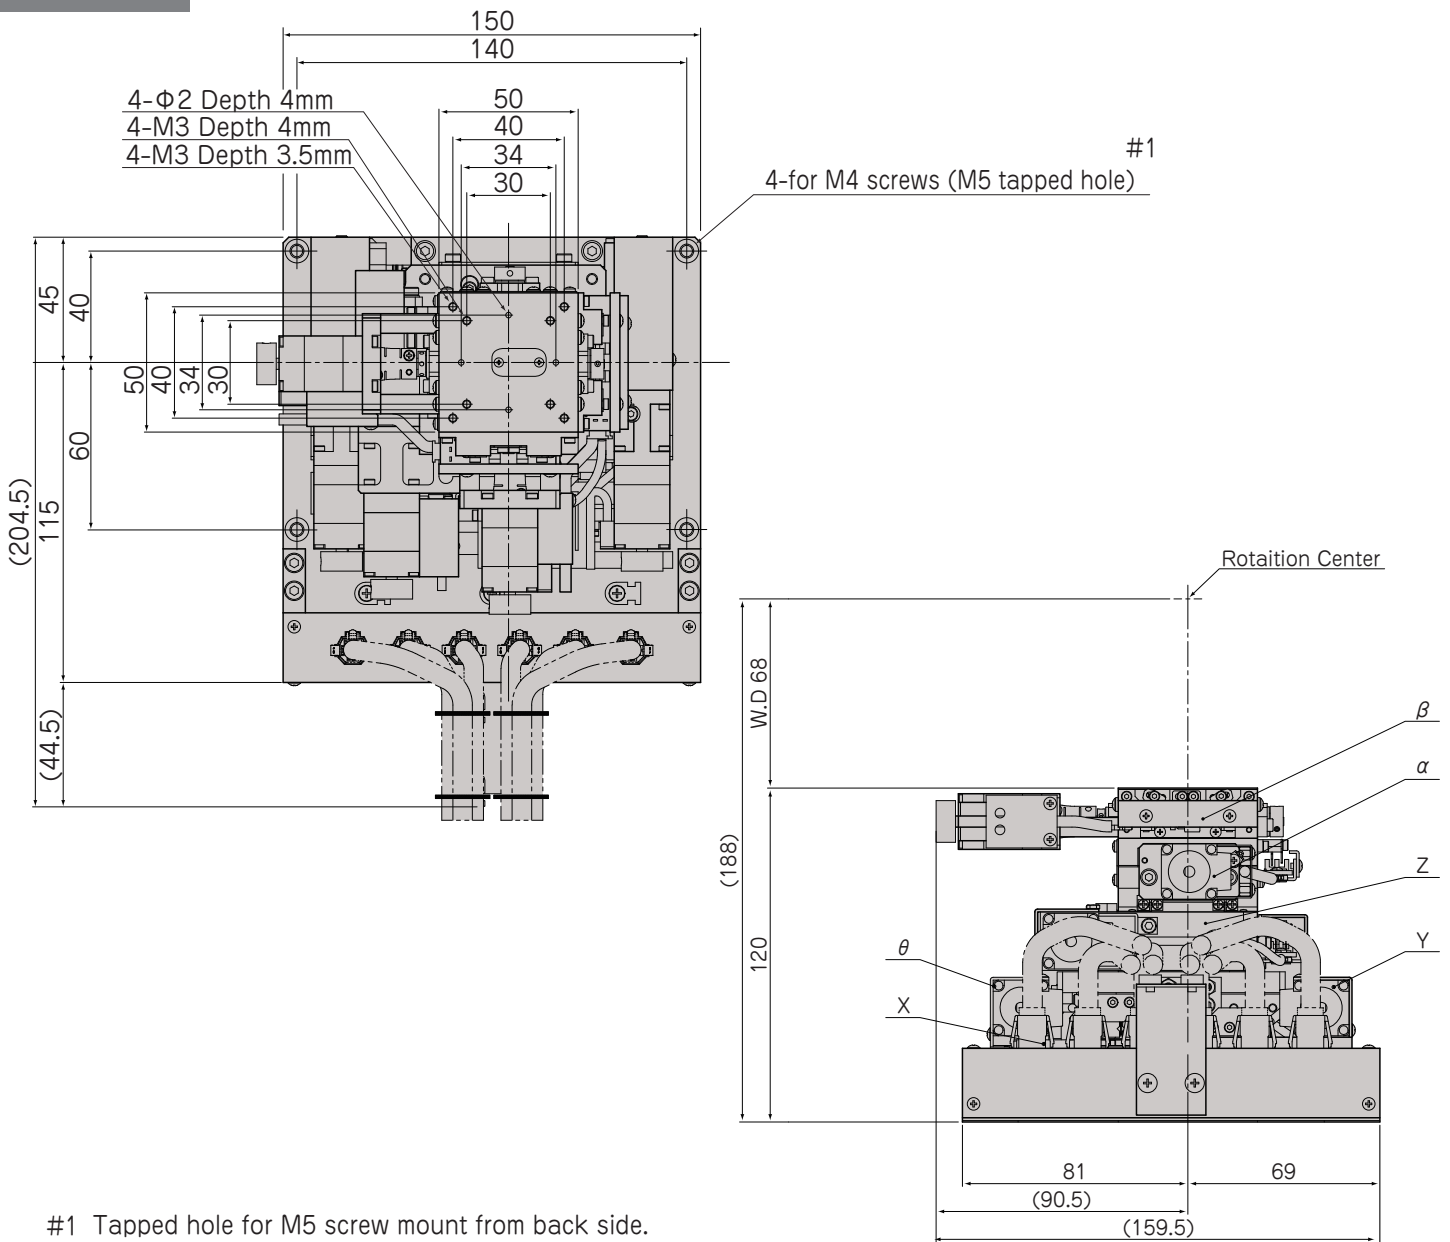

2 Compact and Lightweight

Lightweight design (approx. 3kg) enables installation on highspeed carrier stages

Long stroke X stage Model : XA16F-L23 etc.

USM-R1C-001

#1 Tapped hole for M5 screw mount from back side.

Axis	Motion Range	Max Speed	Resolution (half step)	Resolution (1/20)
X	±3mm	10mm/sec	1 μm	0.1 μm
Y	±3mm	10mm/sec	1 μm	0.1 μm
Z	±1.5mm	2.5mm/sec	0.25 μm	0.025 μm
θ	±3°	12.7°/sec	0.00127°	0.000127°
α	±3°	9.6°/sec	0.00064°	0.000064°
β	±3°	12°/sec	0.00079°	0.000079°

※ Resolution can be changed according to the number of driver divisions. (Micro-Step Setting)
